Additional Comments He appears to be a Black Labrador Retriever or Lab mix with a white patch on his chest. He has an older-looking scar on the bridge of his nose between his eyes, which is one of his most distinctive features.

He is not neutered and does not have a microchip.

He had been wandering around the Foxfire neighborhood for the past one to two weeks, but he would run away whenever anyone approached him. We were finally able to safely bring him inside, and now that he feels secure, he has shown himself to be very friendly and affectionate with people.
